

Installation Instructions :

#2535-KBSL : Sliding Keyboard Tray w/ Custom Wrist Rest

Mounting Sliding Keyboard tray to shelf surfaces : This sliding keyboard tray has 11" inches of travel and retracts fully under the shelf surface. When fully retracted the tray is secured into place with a snap catch preventing the tray from sliding out when mounted to a tilted shelf. A key feature of the tray is that it can mount to an already mounted tray!

****Mounting Location Possibilities :** All 4-Point Tilt Shelves, All Countertops, All Cantilevered Shelves except Light Duty Shelves, Inside Corner Shelves, Peninsula Work Surface.

STEP - 1 : Under shelf Mounting : Start 4 standard screws into the threaded holes marked 'K' on the underside of the shelf leaving approx. 3/16" of the threads exposed.

STEP - 1 : Under Existing Keyboard Tray Mounting : Start 4 standard screws into the threaded holes in the bottom of the tray's mounting brackets leaving approx. 3/16" of threads exposed.

STEP - 2 : Lift the keyboard tray onto the screws passing the heads of the screws through the keyed holes on the top of the tray's mounting brackets and then pushing the keyboard assembly towards the rear of the shelf to seat the screws in the keyed holes.

STEP - 3 : With the keyboard assembly now hanging on the screw heads, tighten the screws using the screwdriver access holes in the bottom of the tray's mounting brackets.

Tighten all mounting screws before loading with equipment!
