

Installation Instructions :

#2535-KBSTA : Clip - on Keyboard Tray w/ Custom Wrist Rest

Mounting Keyboard tray to shelf surfaces : The Clip-on keyboard tray can be mounted to the underside of all 4- Point Tilt shelves, all Countertops & all Cantilevered shelves except the Light Duty shelves.

STEP - 1 : Place the keyboard tray onto the underside of the shelf. The bottom lip of the shelf is to be mated with the two slots at each end of the keyboard tray. Be sure that the tray is tilted as shown in #1

STEP - 2 : While holding the tray against the shelf (as shown in #2) tilt the front of the tray down until it is seated. It will stay in place at this point.

STEP - 3 : Position the tray (either left or right) to where the slots in the tray are over the threaded holes in the underside of the shelf stiffener. Install a standard screw (#12-24) through the slot and into the threaded hole in the stiffener until it is snug. This will prevent the tray from being knocked loose.
